*Issue - 59 | 2026- 27*

## Greetings from MM School

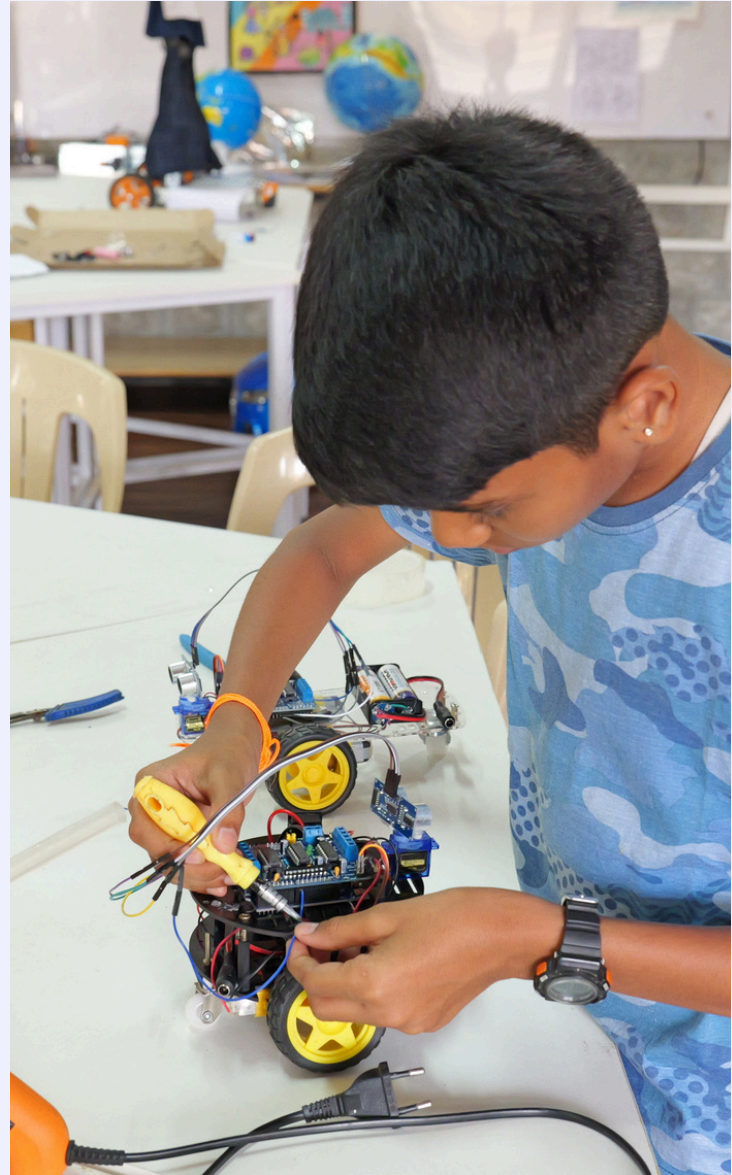

At MM School, we believe that true education goes beyond textbooks and classrooms. This year's Summer Camp was thoughtfully designed as a vibrant experiential learning ecosystem where students explored, created, collaborated, and discovered their potential—all while having fun.

# EXPLORING

# SKILL BUILDING

From the very first day, the campus came alive with energy, curiosity, and excitement.

Every activity was carefully planned not just for entertainment, but to build essential life skills that prepare students for the future.

# IGNITING LIFE SKILLS

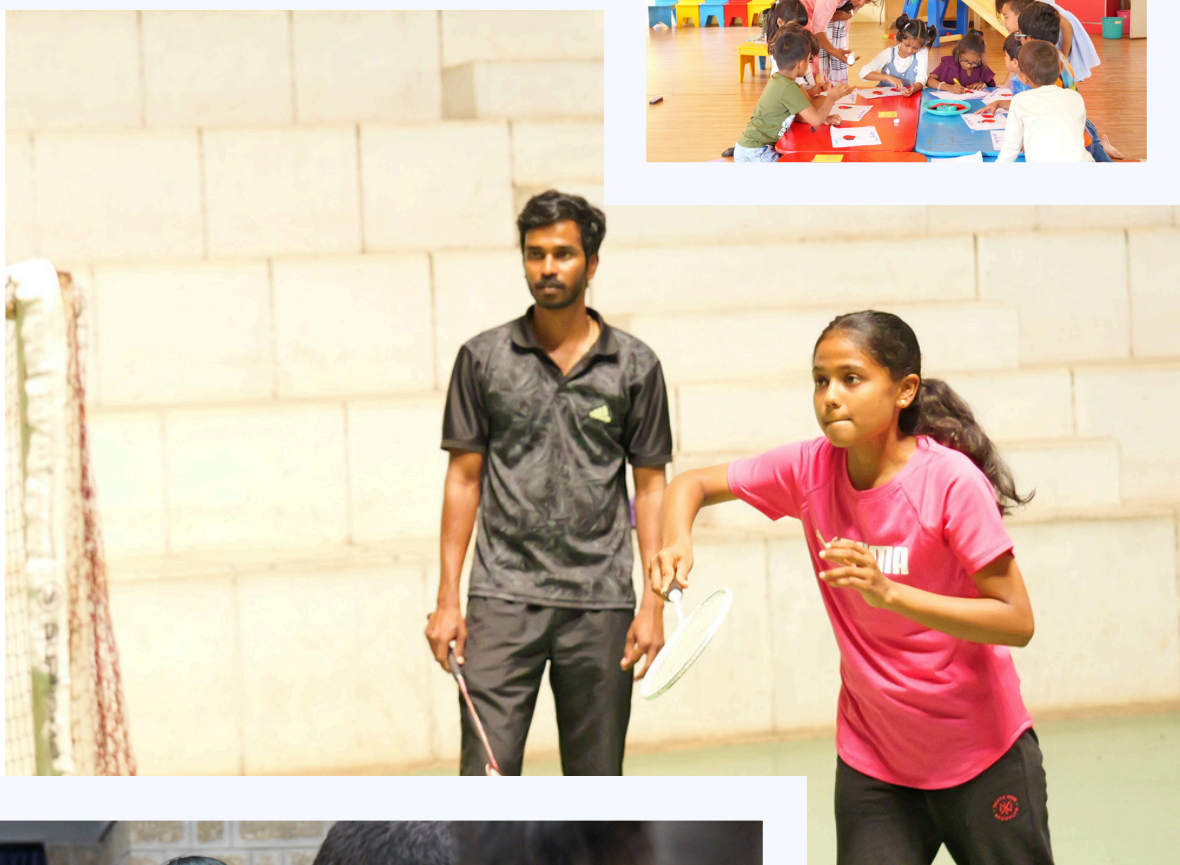

# HANDS ON EXPERIENCE

Our young learners participated in a wide range of experiences including robotics, football, badminton, treasure hunts, art & craft, adventure activities, nature-based learning, relay games, carnival outings, and creative group challenges. Each session encouraged students to move, think, solve, communicate, and collaborate in meaningful ways.

# COLLABORATION

Treasure hunts transformed the campus into an interactive learning space where students used observation, memory, communication, and critical thinking to solve clues and reach their destination.

# CRITICAL THINKING

The Robotics sessions introduced students to logical thinking, problem-solving, teamwork, and innovation as they built and programmed working models through hands-on learning. Sports activities such as football and badminton strengthened coordination, discipline, stamina, teamwork, and confidence.

**PROBLEM SOLVING**

# SELF-EXPRESSION

Creative arts and crafts sessions allowed students to express emotions, imagination, and ideas through meaningful artwork. Students explored different art forms while developing patience, focus, originality, and confidence in self-expression.

# BUILDING RESILIENCE

One of the highlights of the camp was the adventure and outdoor experiential activities. Trekking, obstacle challenges, coordination games, water activities, and confidence-building rides pushed students beyond comfort zones and helped them develop courage, resilience, balance, persistence, and trust in themselves and others.

**FINDING COURAGE**

A unique aspect of the camp was the integration of real-world learning.

Students participated in activities, explored the science and mathematics behind baking brownies with an alumni pastry chef, Mr. Kiran David. These experiences helped children understand that learning is connected to life itself.

# CULINARY LEARNING

# IGNITING CURIOSITY

At MM School, we strongly believe that children learn best when they experience, explore, and actively participate.

Our Summer Camp was not just about keeping students engaged during holidays—it was about igniting curiosity, building confidence, nurturing creativity, and developing lifelong skills in every child.

# RECOGNISING SKILLS

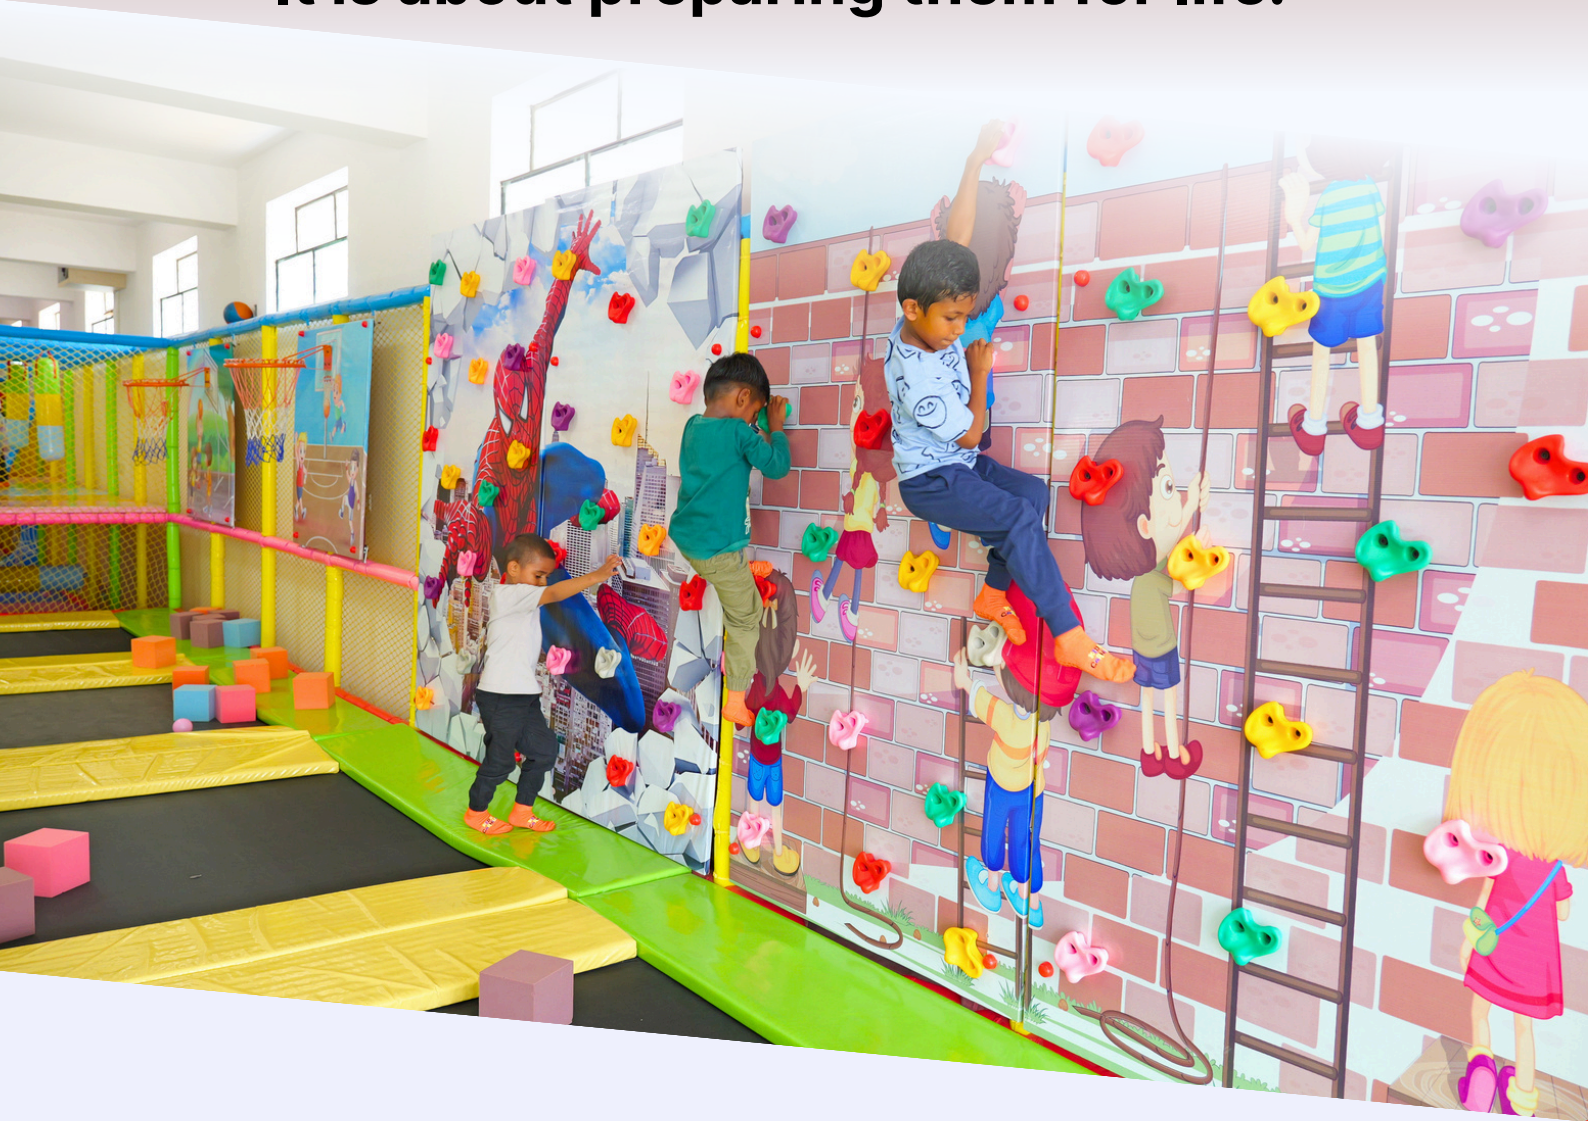

The Summer Camp concluded with a grand Valedictory Ceremony attended by parents, students, and faculty. Students were proudly awarded certificates and personalized photo collages capturing their learning journey and memorable moments from the camp. We were honored by the presence of **Ln. Dr. Nandini Sezhian**, President, Lions Club of Hosur – Pride, Hosur, who inspired and encouraged our young learners during the celebration.

# SKILLS FOR LIFE

Because education is not only about preparing students for exams.

**It is about preparing them for life.**
